Professional Summary

Engineering student pursuing B.Tech in Artificial Intelligence & Data Science with hands-on experience in AI, embedded systems, and full-stack software development. Experienced in developing intelligent applications, embedded hardware prototypes, and modern web solutions. Passionate about building practical technology at the intersection of artificial intelligence, automotive systems, and software engineering.

Education

KPR Institute of Engineering and Technology (KPRIET)

B.Tech in Artificial Intelligence & Data Science

CGPA: **9.42/10**

Coimbatore, India

2025 – 2029

Experience

AI & Automotive Embedded Systems Intern

Jun 2026 – Jul 2026

Unimax Technologies, Coimbatore

- Worked on AI and embedded systems projects for automotive applications alongside experienced engineers.
- Assisted in embedded hardware integration, software development, system testing, and AI-based solution development.
- Collaborated with engineers to develop and test AI-enabled embedded solutions for automotive applications.

Technical Skills

Languages: Python, JavaScript, R, Java, C, C++, SQL, HTML/CSS

Frameworks & Libraries: React, Vite, Bootstrap, TailwindCSS, PyTorch, Supabase, REST APIs

Developer Tools: Git, GitHub, Docker, Linux, Jupyter Notebook

Core Competencies: Artificial Intelligence, Computer Vision, Embedded Systems, Full-Stack Development, Automotive Software, REST APIs, Object-Oriented Programming

Projects

AegisADAS – AI Driver Assistance System | *Python, OpenCV, YOLOv8, ESP32*

[GitHub](#)

- Developed an AI-powered Advanced Driver Assistance System (ADAS) integrating computer vision with embedded hardware for intelligent vehicle safety.
- Implemented real-time vehicle detection using YOLOv8 and integrated ESP32-controlled relays for automatic high/low beam switching.

TableNet – Smart Restaurant Ordering Platform | *React, PostgreSQL, JavaScript*

[GitHub](#)

- Developed a QR-code based restaurant ordering platform enabling customers to browse menus and place orders digitally.
- Built responsive interfaces for customers and restaurant management with real-time menu and order management.

Inventrobil – Inventory & Billing System | *JavaScript, Python, Flask*

[GitHub](#)

- Designed and developed an Inventory and Billing Management System for streamlining retail operations.
- Implemented inventory tracking, product management, and billing workflows through an intuitive web interface.

Fluxboard – Firefox Productivity Extension | *JavaScript*

[GitHub](#)

- Developed a lightweight Firefox new-tab extension featuring bookmarks, notes, task management, and clock widgets.
- Published on the Mozilla Add-ons Store and received positive feedback for its clean and distraction-free interface.

BitMapper2D – 2D Tile Map Editor | *Python*

[GitHub](#)

- Built a lightweight 2D tile-map editor to accelerate game development and level design workflows.
- Implemented tile placement, grid rendering, and map export functionality for rapid prototyping.

Achievements & Activities

- Co-founded LbxSuite Agency and contributed to the design and development of software solutions, websites, and digital products.
- Contributed to multiple open-source and collaborative software projects through GitHub, including bug fixes, feature development, and documentation improvements.
